

# LAURIE J. HENDREN

## Personal Data

Date of Birth: December 13, 1958

Place of Birth: Peterborough, Ontario, Canada

Nationality: Canadian

Address: School of Computer Science  
McGill University  
318 McConnell Engineering Building  
3480 University Street  
Montreal, Quebec  
H3A 2A7

Telephone (work): (514) 398-7391

E-mail: hendren@cs.mcgill.ca

URL: <http://www.sable.mcgill.ca/~hendren>

## Education

- Ph.D.:  
September 1985 to December 1989, M.S. granted August 1988, Ph.D. granted January 1990.  
Department of Computer Science, Cornell University.  
Ph.D. Thesis Title: Parallelizing Programs with Recursive Data Structures.
- M.Sc.:  
September 1982 to February 1984, Department of Computing and Information Science, Queen's University at Kingston, Canada.  
M.Sc. Thesis Title: ISON - An Introductory Subset of Nial.
- B.Sc. (Honours):  
September 1977 to May 1982, Department of Computing and Information Science, Queen's University at Kingston, Canada.

## Honours and Awards

- Canada Research Chair in Compiler Tools and Techniques - Renewal, 2018.
- Merck Patients First Award, For Opal, an Oncology Portal and Application. With Tarek Hijal (Radiation Oncology) and John Kildea (Medical Physics), 2018.
- Honorable Mention, Institute for Patient- and Family-Centered Care Partnership Award. For Opal, an Oncology Portal and Application. With Tarek Hijal (Radiation Oncology) and John Kildea (Medical Physics), 2017.
- Winner of the Prix de cancérologie 2016, dans la catégorie Organisation des services, pour le project *Implémentation d'un système de gestion de la salle d'attente via une application mobile et un portail pour les patients en oncologie*. With Tarek Hijal (Radiation Oncology) and John Kildea (Medical Physics), November 2016. This award also came with an invited presentation at the 2016 DGC conference.
- The “5 of Diamonds” in the Notable Women in Tech Card Deck, <http://www.notabletechnicalwomen.org>, 2014.
- Fellow of the Royal Society of Canada, 2012.
- Canada Research Chair in Compiler Tools and Techniques, 2011.
- Leverhulme Visiting Professor, Oxford, 2010-2011 (sabbatical).
- Visiting Scholar, Wolfson College, Oxford, 2010-2011 (sabbatical).
- ACM Fellow, 2009.
- Leo Yaffe Award for Excellence in Teaching, Faculty of Science, McGill University, 2006.
- Sage Fellowship, Cornell University, 1985-86.
- Natural Sciences and Engineering Research Council of Canada, Postgraduate Scholarship, 1982-84.
- Departmental Medal in Computing and Information Science, Queen’s University at Kingston, 1982.
- Entrance Scholarship, Queen’s University at Kingston, 1977.

## Academic and Research Positions

- April 2017 to present:  
Associate Investigator, Research Institute of the McGill University Health Centre (RI-MUHC).
- December 2001 to present:  
Professor, School of Computer Science, McGill University.

- September 2005 to August 2014:  
Associate Dean (Academic), Faculty of Science, McGill University.
- June 1995 to November 2001:  
Associate Professor, School of Computer Science, McGill University.
- July 1990 to May 1995:  
Assistant Professor, School of Computer Science, McGill University.
- January 1990 to June 1990:  
Research Associate (post-doctoral position), Department of Computing and Information Science, Queen's University.
- September 1987 to December 1989:  
Research Assistant, Department of Computer Science, Cornell University.
- June 1986 to December 1986:  
Research Assistant, Microflow Project, Department of Computer Science, Cornell University.
- May 1985 to September 1985:  
Research Associate, Q'Nial Project, Department of Computing and Information Science, Queen's University at Kingston, Canada.
- June 1984 to May 1985:  
Senior Programmer, Nial Systems Limited, Kingston, Canada.
- February 1982 February 1984:  
Research Assistant, Q'Nial Project, Department of Computing and Information Science, Queen's University at Kingston, Canada.
- Summer 1981:  
Research Assistant, Medical Engineering, Division of Electrical Engineering, National Research Council of Canada.

## Research Grants

*Note: In the following list the Principal Investigator is underlined.*

- Rossy Cancer Network, Cancer Quality and Innovation Grant, Hendren, Hijal, Kildea, As-selah, Lambert, Faria and Davidson *Developing and Evaluating a Mobile Application for Caregivers*, \$100,000, 2018-2019.
- NSERC Canada Research Chair - Renewal, Hendren, *Compiler Tools and Techniques*, \$56,000 per year research grant, 2018-2025.

- Canadian Partnership Against Cancer Grant, Lambert, Faria, Rosberger, McCusker, Kildea, Hendren, Hijal, Beauchamp, Ly, Hamel, *e-IMPAQC: Implementation and evaluation of an e-Health application for the systematic assessment of patient and caregiver reported outcomes in Quebec across the cancer continuum*. \$300,000 per year (\$1,500,000 total), 2018-2022
- Montreal General Hospital Foundation Grant, Hendren, Hijal and Kildea (joint PIs), *Development of the Oncology Portal and Application*, \$215,000 (total), 2017-2018.
- Cedars Cancer Foundation Grant, Hendren, Hijal and Kildea (joint PIs), *Development of the Oncology Portal and Application*, \$100,000 (total), 2017-2018.
- NSERC Discovery Grant, Hendren, *Compilers, Tools and Languages for Scientists*, \$50,000 per year, 2015-2020.
- MUHC Challenge Q+ Award, Hendren, Hijal and Kildea (joint principal investigators), *Managing the Pain of Waiting for Radiotherapy*, \$150,000 (total), 2014-2016.
- NSERC Research Tools and Instruments Grant, Hendren and Verbrugge, *Scalable Infrastructure for Compiler and Virtual Machine Research*, \$65,508, 2011-2012.
- NSERC Canada Research Chair, Hendren, *Compiler Tools and Techniques*, \$56,000 per year research grant, 2011-2018.
- NSERC Discovery Grant, Hendren, *Languages, compilers and virtual machines for scientists*, \$43,000 per year, 2010-2015.
- Microsoft Award, Hendren, *Scientific programming languages and associated compiler tools*, \$5,000, 2008.
- NSERC Equipment Grant, Verbrugge and Hendren, *Refurbishment of Sable Lab*, 2006-07.
- NSERC Discovery Grant, Hendren, *Analysis and Optimization of Object-Oriented and Aspect-Oriented Programs*, \$64,000 per year, 2005-2010.
- FQNRT (FCAR) Team Grant, Hendren, Driesen and Verbrugge, *Understanding and Optimizing Object-Oriented and Concurrent Programs*, Operating (\$65,000 per year, 2003-2006), Equipment (\$33,000, 2003-2004).
- EPSRC Visiting Fellow, de Moor, *Compiler Tools and Techniques for Object-Oriented and Aspect-Oriented Programs*, 2003-3004.
- NSERC Research Grant, Hendren, *Compiler tools and techniques for analysis and optimization of Java*, \$52,000 per year, 2001-2005.
- IBM Faculty Partnership Award, Hendren, \$61,000 (\$40,000 US) per year, 2001-2004.
- IBM Scholars Program - Eclipse Innovation Grant, Hendren, \$33,000 (\$25,000 US), 2004.
- IBM Scholars Program - Eclipse Innovation Grant, Hendren, \$39,000 (\$25,000 US), 2003.
- NSERC Equipment Grant, Hendren, *Support for the Sable Group's Computing Lab, (File and Compute Servers)*. \$59,754, 2001-2002.

- FCAR Team Grant, Hendren, Panangaden and Debbabi, *The Design, Analysis and Implementation of Modern Concurrent Programming Languages*, \$42,000 per year (plus \$15,000 equipment), 1998-2001.
- NSERC Research Grant, Hendren, *The Design, Implementation and Application of Program Analyses and Transformations*, \$40,000 (1997-98, 1998-99), \$44,000 (1999-2000), \$46,200 (2000-2001), 1997-2001.
- NSERC Equipment Grant, Hendren, *Equipment to Support the Sable Java Compiling Group (Workstations)*, \$19,236, 1998-1999.
- NSERC Research Grant, Hendren, *Compiling for High-Performance Architectures*, \$29,000 per year, 1994-1997.
- FCAR Team Grant, Panangaden, Gao and Hendren, *Une approche unifiée pour le calcul en parallèle*, \$13,470 equipment, 1994-1995; \$28,500 per year, 1994-1997.
- NSERC Strategic Grant, Gao, Hendren, Hum and Panangaden, *A Multithreaded Approach to High-Performance Computing and its Implementation*, \$21,549 equipment, 1993-1994; \$110,000 per year operating, 1993-1997.
- NSERC Equipment Grant, Gao, Hendren, Panangaden, Avis and Tropper, *Distributed Computing*, \$45,811, 1996-97.
- NSERC Industrially-Oriented Research Grant (with Bell Northern Research), Hendren and Gao, *Compiling for Application Specific Instruction-Set Processors*, \$60,000, 1995-1996.
- NSERC Equipment Grant, Hendren, Gao and Panangaden, *File and Compute Servers*, \$29,414, 1994-1995.
- CRIM Industrial Research Grant, Hendren, *Portable Parallel Programming Environment*, approx. \$6,000 per year, 1993-1995.
- NSERC Equipment Grant, Gao, Hendren and Panangaden, *McCAT, McGill Compiler-Architecture Testbed*, \$28,000, 1992-1993.
- FCAR Team Grant, Panangaden, Gao and Hendren, *Architectural Models and Programming Principles for Parallel Processing*, \$22,520 per year, 1991-1994.
- FCAR Nouveau Chercheur, Hendren, *Compiling for Parallel Architectures*, \$8,432 equipment, 1991-1992; \$11,839 per year operating, 1991-1994.
- NSERC Operating Grant, Hendren, *Compiling for Parallel Architectures*, \$19,000 per year, 1991-1994.
- NSERC Equipment Grant, with Panangaden, Gao, ElGindy, Hendren, Merrett, Paige and Tropper, *16-processor upgrade for BBN Butterfly*, \$85,216, 1991-1992.
- McGill Equipment Grant, Hendren, \$8,000, 1990.

## Publications

### Importance of Conference Publications

My publication profile includes both journal and conference publications. In my field conference publications are very important, are rigorously reviewed, widely disseminated and cited, and are taken very seriously by the research community. As this is somewhat unusual and sometimes misunderstood, a report was written for the National Academy Press and a summary of this report was published in an article entitled “Academic Careers for Experimental Computer Scientists and Engineers” published in the April 1994 issue of the Communications of the ACM. This report includes the following paragraph.

*“The ECSE research community depends heavily on conferences to communicate knowledge, and conferences are widely regarded as the preferred medium for maximizing the effect of ECSE research. However, the tenure and promotion process at many universities does not give conference presentations and publications a weight appropriate to their significance in the field, preferring instead publications in archival journals.”*

In fact, the top-notch conferences are highly competitive and papers presented at these conferences are reviewed and widely cited. The three most prestigious conferences relevant to my work are the ACM SIGPLAN sponsored conferences POPL (Principles of Programming Languages), PLDI (Programming Language Design and Implementation), and OOPSLA (Object Oriented Programming, Systems, Languages and Applications). It is very difficult to get papers accepted into these conferences. Serious researchers send only their best work to these conferences and typically the acceptance rate is about 20%. Papers are reviewed by three program committee members, and usually by at least one person outside the program committee. The papers appear in proceedings that are widely available in print form and through the ACM Digital Library. POPL, PLDI and OOPSLA papers are widely cited and form the core of the research literature in my field. We have had papers appearing in PLDI '92, PLDI '94 (two papers), POPL '96, POPL '98, PLDI '98, OOPSLA '00, OOPSLA '03, PLDI '03, PLDI '05, OOPSLA '04, PLDI '05, OOPSLA '05, OOPSLA '08, OOPSLA '11, and OOPSLA '12.

Of course my group also publishes in wide variety of other excellent conferences. For example our recent work on aspect-oriented programming has appeared in the International Conference on Aspect-Oriented Software Development (AOSD). We have had papers at AOSD '11, AOSD '10, AOSD '08, AOSD '06 and AOSD '05. Other important conferences include the International Conference in Compiler Construction, where we publish regularly, and a variety of software engineering and program understanding conferences.

### Journal Publications

1. J. Kildea, J. Battista, B Cabral, L. Hendren, D. Herrera, T. Hijal, and A. Joseph, *Design and development of a person-centered patient portal using participatory stakeholder co-design*, Journal of Medical Internet Research, accepted pre-print (June 2018, <http://preprints.jmir.org/preprint/11371>), final version, <https://www.jmir.org/2019/2/e11371/>, February 2019.

2. Laurie Hendren, *Patient-controlled data*, Oncology Exchange (COMMENT), Vol. 17, No. 1, pp. 8-11, February 2018.
3. Maxim Gorshkov and Laurie Hendren, *SOCS Wayfinder: Using a Low Cost Solution for Geolocation and Pathfinding Indoors*, International Journal of Computer Applications, Volume 152, Number 1, 8 pages, October 2016.
4. Stephen M. Blackburn, Amer Diwan, Matthias Hauswirth, Peter F. Sweeney, José Nelson Amaral, Tim Brecht, Lubomir Bulej, Cliff Click, Lieven Eeckhout, Sebastian Fichmeister, Daniel Frampton, Laurie J. Hendren, Michael Hind, Antony L. Hosking, Richard E. Jones, Tomas Kalibera, Nathan Keynes, Nathaniel Nystrom, and Andreas Zeller, *The Truth, the Whole Truth, and Nothing but the Truth: A Pragmatic Guide to Assessing Empirical Evaluations*, ACM Transactions on Programming Languages and Systems (TOPLAS), Volume 38, Issue 4, Article No. 15, pp. 15:1-15:20, October 2016.
5. Eric Bodden, Patrick Lam and Laurie Hendren, *Partially Evaluating Finite-State Runtime Monitors Ahead of Time*, ACM Transactions on Programming Languages and Systems, Vol. 34, No. 2, pp. 7:1-7:52, 2012.
6. Eric Bodden and Laurie Hendren, *The Clara Framework for Hybrid Typestate Analysis*, International Journal on Software Tools for Technology Transfer, Volume 14, Issue 3, pp. 307-326, 2012.
7. Eric Bodden, Laurie Hendren, Patrick Lam, Ondrej Lhotak and Nomair Naeem, *Collaborative Runtime Verification with Tracematches*, Journal of Logic and Computation, 20(3), pp 707-723, 2010.
8. Ondrej Lhotak and Laurie Hendren, *Evaluating the Benefits of Context-Sensitive Points-to Analysis using a BDD-based Implementation*, ACM Transactions on Software Engineering and Methodology, Vol. 18., No. 1, pp. 1-53, 2008.
9. Ondrej Lhotak and Laurie Hendren, *Relations as an abstraction for BDD-based program analysis*, ACM Transactions on Programming Languages and Systems, Vol. 30, No. 4, pp. 1-63, 2008.
10. Pavel Avgustinov, Aske Simon Christensen, Laurie Hendren, Sascha Kuzins, Jennifer Lhotak, Ondrej Lhotak, Oege de Moor, Damien Sereni, Ganesh Sittampalam and Julian Tibble, *abc: An Extensible AspectJ compiler*, Transactions on Aspect-Oriented Software Development, Volume 1, pp. 293-334, March 2006.
11. Ondrej Lhotak and Laurie Hendren, *Run-time evaluation of opportunities for object inlining in Java*, Concurrency and Computation: Practice and Experience, Vol. 17, Issue 5-6, pp. 515-537, April-May 2005.
12. Yingchun Zhu and Laurie Hendren, *Communication Optimizations for Parallel C Programs*, Journal of Parallel and Distributed Computing, Vol. 58, No. 2, pp. 301-332, 1999.
13. Yingchun Zhu and Laurie Hendren, *Locality Analysis for Parallel C Programs*, IEEE Transactions on Parallel and Distributed Systems, Vol. 10, No. 2, pp. 99-114, 1999.

14. Laurie J. Hendren, Xinan Tang, Yingchun Zhu, Shereen Ghobrial, Guang R. Gao, Xun Xue, Haying Cai and Pierre Ouellet, *Compiling C for the EARTH Multithreaded Architecture*, International Journal of Parallel Programming, Vol. 25, No. 4, pp. 305-337, 1997.
15. Rakesh Ghiya and Laurie J. Hendren, *Connection Analysis: A Practical Interprocedural Heap Analysis for C*, International Journal of Parallel Programming, Volume 24, No. 6, pp. 547-578, 1996.

Rosana Faria, Susan Law, Tarek Hijal, Joan Zidulka, Manon Allard, George Michaels, Monique Ferland, Danielle Potas, Laurie Hendren, Givette Volet, Klaudijus Kuncevicus, and Mona Magalhaes, *Looking Forward: Intervention design and pilot study of a supportive re-entry program tailored by and for patients completing cancer treatment*, poster presentation, Canadian Association of Psychosocial Oncology (CAPO), April 2015. (Poster presentation)

## Software Systems

### Importance of Experimental Software Systems

In addition to publications, the kind of experimental work I do also requires the development of large and complex software systems. It is my view that the development of such systems is an integral part of the design of new analyses and approaches, and the design of such systems is often a research project itself. Such an experimental system is of critical importance in demonstrating the usefulness of a technique or approach and also can provide the foundations for future research both in my own research group and for research groups around the world. Thus, whenever possible, we provide our tools under open source licenses.

### Major Software Systems

1. Opal, a patient portal designed to empower patients with their medical information at the McGill University Health Centre. Co-led with John Kildea (Medical Physics) and Tarek Hijal (Radiation Oncology).  
[opalmedapps.com](http://opalmedapps.com)
2. McLAB, a compiler and VM toolkit for scientific languages, including a front-end toolkit, a VM with JIT and a MATLAB-to-Fortran compiler.  
<http://www.sable.mcgill.ca/mclab>.

The McLab framework is a project for developing both toolkits and new analyses and techniques for dynamic scientific programming languages like Matlab. There is currently a real lack of such toolkits and it is our hope that by providing such a framework we can stimulate

academic research into dynamic scientific language design and associated virtual machines and compilers.

Currently the framework is being used by my research group and a graduate class. We have released the first version of the framework under an open source license. We have also released the AspectMatlab compiler.

3. abc, the AspectBench Compiler, developed with Oxford, Aarhus and Waterloo.  
<http://www.sable.mcgill.ca/abc/>.

The abc framework has become a popular framework for researchers designing and implementing new extensions to the aspect-oriented language AspectJ. Some of these extensions, which are also publicly-available are listed at <http://www.sable.mcgill.ca/abc/projectsexts>.

4. Soot, a Java Bytecode Analysis and Transformation Framework.  
<https://sable.github.io/soot/>.

Soot is probably our most widely used toolkit. It is not uncommon to see at least a couple of papers at each compiler conference which have used Soot as their main toolkit. It is also quite often used in advanced compiler courses. A wiki listing some users is found at <https://svn.sable.mcgill.ca/wiki/index.cgi/SootUsers>. Although this is just a voluntary list (and thus does not include many users) it does give a good flavour of the wide variety of research that uses Soot.

## Other Software Systems

1. Metalexer, an extensible lexer generator,  
<http://www.sable.mcgill.ca/metalexer>.

Metalexer was developed to fulfill the need for a lexer generator that was modular and could be used naturally in extensible toolkits (like McLab and abc).

2. SableCC, the Sable Research Group's Compiler Compiler.

SableCC was started as the M.Sc. research project of Etienne Gagnon. Etienne is now a professor at UQAM and continued the development. His current web site is <http://sablecc.org>.

3. SableVM, a portable Java Virtual Machine,  
<http://www.sablevm.org/>.

4. Ashes, a collection of Java Benchmarks and Scripts,  
<http://www.sable.mcgill.ca/ashes/>.

5. EVolve, an Extensible Software Visualization Framework,  
<http://www.sable.mcgill.ca/evolve/>.

6. STEP, an Extensible Program Trace Encoding,  
<http://www.sable.mcgill.ca/step/>

7. PTA-BDD, a Points-to Analysis using BDDs,  
<http://www.sable.mcgill.ca/bdd/>

8. Paddle, a BDD-based Context-Sensitive Interprocedural Analysis for Java,  
<http://www.sable.mcgill.ca/paddle/>
9. Dava, a Tool-Independent Decompiler for Java,  
<http://www.sable.mcgill.ca/dava/>
10. JBCO, the Java Bytecode Obfuscator,  
<http://www.sable.mcgill.ca/JBCO/>
11. AIA, Aspect Impact Analysis,  
<http://www.sable.mcgill.ca/aia/>

## Invited Lectures, Talks and Tutorials

- Invited speaker, *Developing Opal, an App for Cancer Patients, as a Computer Scientist and Cancer Patient*, SPLASH-I track, SPLASH 2018, November 2018.
- Invited speaker (with J. Kildea and T. Hijal), *Implementation of a waiting room management system with a mobile application and portal for oncology patients*, Innoveaction - Réinvente la Santé, November 2018.
- Invited speaker, 3rd Annual Rossy Cancer Network Retreat, *How can information technology be used to support implementation of patient-reported outcome measures?*, November 2017.
- Invited speaker, *Patient-held data to facilitate the care pathway and quality control*, Quality in action in a networked system, Conference of the MUHC-ISAI, October 2017.
- Invited speaker, *Opal - the Oncology Portal and Application*, with John Kildea, Annual meeting of the Montreal General Hospital Board and Foundation, June 2016.
- Invited speaker, *Opal - the Oncology Portal and Application*, with John Kildea and Tarek Hijal, Meeting of the McGill University Health Centre Board of Directors, April 2016.
- Invited speaker, *Example Patient Partnerships that Work*, Canadian Organization of Medical Physicians, 2016 Winter School, Montebello, QC, February 2016.
- Invited speaker, Distinguished Lecture Series, *Compiler Tools and Techniques for MATLAB*, Virginia Tech, August 2015. (<https://www.cs.vt.edu/DistinguishedLectures/hendren>)
- Invited speaker, St. Mary's Hospital Research Centre, *Perspectives of a Breast Cancer Patient: Goldilocks and the Baby Bears*, May, 2015.
- Invited speaker, Distinguished Lecture Series, *Compiler Tools and Techniques for MATLAB*, University of Waterloo, March 2015. (<https://cs.uwaterloo.ca/events/dls-laurie-hendren-compiler-tools-and-techniques-matlab>)
- Invited speaker (with Tarek Hijal and John Kildea), *Addressing the Pain of Waiting - a Health Informatics Approach*, Oncology Grand Rounds, MUHC, March 2015.

- Invited speaker, *Perspectives of a Radiation Oncology Patient*, Canadian Organization of Medical Physicists, 2015 Winter School, Kelowna, BC, February 2015.
- Invited speaker, *Experiences as a cancer patient*, McGill Systems Biology Training Program, November 2014.
- Invited speaker, *McLab: Enabling compiler research for MATLAB*, ECOOP Program Committee Workshop, University of Kent, March 2014.
- Invited speaker, *McLab: Enabling compiler research for MATLAB*, NSF DALI Workshop on Dynamic Languages for Scalable Data Analytics, co-located with SPLASH 2013, November 2013.
- Invited speaker, Workshop on Implementation, Compilation, Optimization of Object-Oriented Languages, Programs and Systems (ICOOOLPS '12), co-located with ECOOP 2012, June 2012.
- Keynote speaker, 10th Workshop of Compiler-Driven Performance, November 10, 2011.
- Keynote speaker, International Symposium on Software Testing and Analysis, July 2011. See <http://issta11.unl.edu/program/invited-speakers/>.
- Leverhulme Lecture Series, University of Oxford. For complete links and slides see <http://www.sable.mcgill.ca/mclab/leverhulme.html>.
  - *Compiler Tools for MATLAB*, June 10, 2011.
  - *Language Extensions for MATLAB*, June 17, 2011.
  - *McLAB: A Toolkit for Static and Dynamic MATLAB Compilers*, July 1, 2011.
- Invited speaker, Imperial College London LogIC Seminar, June 26 2011. See <http://www.doc.ic.ac.uk/~bl610/logICseminar/>.
- Invited speaker, University of Cambridge Computing Laboratory Colloquium, June 15, 2011.
- Moderator, Panel on *Teaching Programming Language Design and Implementation ... What? To Whom? How?*, International Conference on Programming Language and Implementation (PLDI 2011), June 8, 2011.
- Tutorial presentation, *Introduction to MATLAB, a compiler and VM framework for MATLAB*, presented by Laurie Hendren, Rahul Garg and Nurudeen Lameed, PLDI 2011, June 2011. See [http://www.sable.mcgill.ca/mclab/pldi\\_tutorial](http://www.sable.mcgill.ca/mclab/pldi_tutorial).
- Invited speaker, University of Edinburgh Informatics, Institute for Computing Systems Architecture Seminar, June 14, 2011. See <http://wcms.inf.ed.ac.uk/icsa/events/laurie-hendren-compiler-tools-for-matlab>. During this visit I also was asked to create a podcast, see <http://computersciencepodcast.com/podcasts.html>.
- University of Herfordshire, Computer Science Research Colloquium, May 31, 2011. See <http://cs-colloq.feis.herts.ac.uk/hendren2011.txt>.

- University of Kent, School of Computing Colloquium, December 14, 2010. See [http://www.cs.kent.ac.uk/dept\\\_info/seminars/2010\\\_11/seminars.html](http://www.cs.kent.ac.uk/dept\_info/seminars/2010\_11/seminars.html).
- Invited speaker, *Pointer Analysis - Experiences and Future Challenges*, Visions of Computer Science, British Computing Society, September 2008.
- Speaker and Panel Chair, *The Future of Compiler Education*, Workshop of Future Directions of Compiler Research, University of Southern California, Information Sciences Institute, CA, USA, Feb 2007.
- Keynote speaker, *Optimizing AspectJ with abc*, MASPLAS 2006, Rutgers, December 2006.
- Harvard University, Colloquium, *Optimizing AspectJ with abc*, December 1, 2005.
- Tutorial presentation, *abc: A Workbench for Aspect-Oriented Programming Language Research*, presented by Oege de Moor (Oxford), Laurie Hendren (McGill), Sascha Kuzins (Oxford) and Damien Sereni (Oxford), AOSD 2005, March 2005.
- Speaker, *abc - The AspectBench Compiler*, 3rd Workshop of Compiler-Driven Performance, in association with CASCON 2004, October 2004.
- Cambridge University, Departmental Seminar, *Soot, Points-to Analysis and BDDs*, November 21, 2003.
- Oxford University, Computing Laboratory Seminar, *Soot, Points-to Analysis and BDDs*, November 25, 2003.
- Series of tutorials on Soot, Oxford Computing Lab, September to October 2003.
- Tutorial presentation, *Soot, a Tool for Analyzing and Transforming Java Bytecode*, presented by Laurie Hendren, Patrick Lam, Jennifer Lhotak, Ondrej Lhotak and Feng Qian, presented at PLDI 2003, June 2003.
- Université du Québec à Montréal, Departmental Research Seminar, *Optimizing Compilers: How good are they?*, March 21, 2003.
- Speaker, *Soot - a Java bytecode analysis and transformation toolkit*, Dagstuhl Seminar on Program Analysis for Object-Oriented Evolution, February 2003.
- Keynote Lecture in Computer Science, APICS Math/Stat and CS Meeting, Mount Allison University, presentation on *Optimizing Compilers: How good are they?*, October 19, 2002.
- Oxford University, Computing Laboratory, Seminar on *Analyzing and Transforming Java Bytecode using the Soot Framework*, May 2002.
- University of Alberta, Distinguished Lecturer Series, presentation on *Analyzing and Decompile Java Bytecode*, January 2002.
- IBM Watson Lab, invited talk, presentation on *Optimizing Java Bytecode using Soot*, February 2001.

- Speaker, *Practical Virtual Method Call Resolution for Java*, Dagstuhl Seminar on the Effective Implementation of Object Oriented Programming Languages, November 2000.
- University of Alberta, Department of Computer Science, Departmental Seminar, presentation on *Optimizing Java Bytecode*, February 2000.
- Speaker, *Tools and Analyses for Java Bytecode*, Dagstuhl Seminar on Program Analysis, Dagstuhl, Germany, April 1999.
- Kansas State University, Department of Computing and Information Sciences, Distinguished Lecturer Series, presentation on *Optimizing and Parallelizing Compilers: How good are they?*, November 1998.
- Kansas State University, Department of Computing and Information Sciences, presentation as part of the mini-workshop on Program Analysis and Model Checking, *The Sable Framework: tools and analyses for Java*, November 1998.
- Rutgers University, Departmental Seminar, presentation on *Putting Pointer Analysis to Work*, July 1998.
- Speaker, *Putting Pointer Analysis to Work* Dagstuhl Seminar on Programs with Recursively Defined Data Structures, Dagstuhl, Germany, April 1998.
- Speaker, *Compiling for Distributed-Memory Architectures (EARTH-C)*, Dagstuhl Seminar on Programs with Recursively Defined Data Structures, Dagstuhl, Germany, April 1998.
- Chalmers University, Functional Programming Languages Seminar, presentation on *Compiling Java: Can we have the elegance of Java and the speed of C?*, Gothenburg, Sweden, May 1997.
- Aarhus University, Departmental Lecture Series, presentation on *Optimizing and Parallelizing Compilers: How good are they?*, Aarhus, Denmark, March 1997.
- Aarhus University, BRICS (Basic Research in Computer Science) Seminar, presentation on *Compiling Java: Can we have the elegance of Java and the speed of C?*, Aarhus, Denmark, February 1997.
- University of Toronto and IBM Toronto, research presentation on *Pointer Analysis in the McCAT C Compiler*, Toronto, Ontario, April 1996.
- INRIA, Rocquencourt, seminar on *Pointer Analysis in the McCAT C Compiler*, Rocquencourt, France, January 1996.
- Queen's University 25th Anniversary Conference, *High-performance Compilers for High-performance Computers*, Kingston, Ontario, June 1994.
- Intel (Compiler Research Group), research meetings and an extended talk on *Interprocedural Analysis of Pointer Data Structures and Intermediate Representations*, San Jose, California, February 1993.

- Cornell University, A series of talks on: (1) *An Introduction to Pointer Analysis*, (2) *Analyzing Imperative Programs with Dynamically-Allocated Pointer Data Structures*, and (3) *Improving the Analysis of Pointer Data Structures*, and (4) a new SPMD (Single Program Multiple Data) model for programs with pointer data structures, September 1992.
- Invited Lecturer, *The Analysis and Transformation of Programs with Pointer Data Structures*, The Leonardo Fibonacci Institute for the Foundations of Computer Science, Course on Parallelizing Compilers, Trento, Italy, June 29-July 3, 1992.
- Stanford University, A series of three talks: (1) *An Introduction to Pointer Analysis*, (2) *Analyzing Imperative Programs with Dynamically-Allocated Pointer Data Structures*, and (3) *Improving the Analysis of Pointer Data Structures*, March 1992.
- Invited Speaker, *Designing Imperative Programming Languages for Analyzability: Parallelism and Pointer Data Structures*, Workshop on Compilation of Languages for Parallel Computers (1991 International Logic Programming Symposium), San Diego, California, October 1991.
- Boston University, *Parallelizing Programs with Recursive Data Structures*, April 1991.
- University of Montreal, *Parallelizing Programs with Recursive Data Structures*, March 1991.
- Princeton University, *Parallelizing Programs with Recursive Data Structures*, February 1991.
- Rutgers University, *Alias Analysis in the Presence of Dynamically-Allocated Pointer Data Structures*, February 1991.
- Speaker, *Parallelizing Imperative Programs with Recursive Pointer Data Structures*, Workshop on Parallelism in the Presence of Pointers and Dynamically-Allocated Objects, Sponsored by the Supercomputing Research Center, Xerox Training Center, Leesburg, Virginia, March 1990.
- Departmental colloquia, given as part of a job interview, M.I.T (March 1990), McGill (March 1990), University of Waterloo (March 1990), Queen's University (March 1990), Syracuse University (March 1990), Carleton University (March 1990), University of British Columbia (February 1990), University of Alberta (February 1990), York University (February 1990), and Penn State University (November 1989).
- Invited Speaker, *Interference Analysis Tools and Parallelization Techniques for C Programs with Recursive Data Structures*, Workshop on Scientific and Numerical Programming in C (Supercomputing '89), Reno, Nevada, November 1989.

## Teaching Experience

I have taught courses at all levels from introductory programming courses for a broad audience to very specialized graduate courses. I take my teaching duties as seriously as my research duties and find that the research inspires new content and projects for my courses and conversely sometimes the courses inspire new research projects.

### Courses taught at McGill

- Co-ordinator, course designer, and instructor for COMP 202, Introduction to Computer Science I, McGill University.
- Instructor for course COMP 203, Introduction to Computer Science II (Algorithms and Data Structures), McGill University.
- Course Designer and Instructor for COMP 303, Programming Techniques, McGill University.
- Course designer and instructor for COMP 520, Compiler Design, McGill University. This course was designed in cooperation with Michael I. Schwartzbach at Aarhus University. It focuses on teaching the principles of compilers as they relate to state-of-the-art applications including the Java programming language, and world wide web documents with state. The course has been adopted by many other institutions. I have recently updated the course to include two possible projects, a subset of the Go programming language, and a domain-specific language I designed called OncoTime.
- Instructor and course designer for COMP 621, Optimizing Compilers, McGill University.
- Instructor and course designer for COMP 762, Special Topics, Advanced Static and Dynamic Compiler Techniques.
- Instructor and course designer for course COMP 763, Special Topics, Advanced Seminar on Compilation and Run-time Techniques.

### Courses taught outside McGill

- Instructor for the course CS 310, Data Structures and Algorithms, Cornell University.
- Project Instructor for the course CS 412, Compiler Construction, Cornell University.
- Instructor for course OPC, Optimizing and Parallelizing Compilers, Aarhus University, Denmark.

### Graduate Students

Typically I have a group of 7-10 graduate students and additionally supervise a large number of undergraduate research projects, both within compilers and health informatics. There are usually significantly more M.Sc. students than Ph.D. students. The M.Sc. students are strong students, they complete quite impressive M.Sc. theses, and most of them co-author at least one research paper. However, many such students prefer to go on to industrial jobs after their M.Sc. studies and their graduate studies is often very useful for them in finding exciting employment opportunities and this also provides industry with well qualified students.

This mix of students, with a considerable number of M.Sc. students, means that my research projects must be quite structured, so that several M.Sc. theses can fit together towards a larger overall goal.

Many of my students have gone on to work at places like IBM Toronto and quite a few have been key players in the compiler groups there, participating in the design and implementation of important new projects.

I am also quite proud of my students who have gone on to be faculty members. Currently Etienne Gagnon is at UQAM, Bruno Dufour was at the University of Montreal, Ondrej Lhotak is at Waterloo and Patrick Lam is at Waterloo. This means that there are now four further active compiler groups at Canadian Universities, leading to more training of qualified compiler people.

Refer to Table 1 for a list of students I currently supervise. Refer to Tables 2, 3 and 4 for a summary of past students and postdocs supervised.

Table 1: Current Graduate Students

**Current Graduate Students**

Alexander Krolik	16-	Ph.D.	<i>GPU JIT compiler</i> (co-advised Verbrugge)
Hanfeng Chen	15-	Ph.D.	<i>Combining array languages and in-memory databases</i> (co-advised Kemme)
Prabhjot Sandhu	15-	Ph.D.	<i>Efficient Sparse Matrices for the Web</i> (co-advised Verbrugge)
Erick Lavoie	13-	Ph.D.	<i>Personal Volunteer Computing</i> (part-time)
Hongji Chen	18-	M.Sc.	Optimization framework for WebAssembly
David Herrera	17-	M.Sc.	Using WebAssembly for efficient execution of array-based programs
Steven Thephsourinthone	16-	M.Sc.	Type inference for MATLAB
Faiz Khan	14-	M.Sc.	<i>Automatic input and test generation for MATLAB</i> (part-time)

Table 2: Graduated M.Sc., Ph.D. Students and Post-Doctoral Researchers (2010 to present)

<b>Post Doctoral Researchers (2010-present)</b>			
Guang Hu	13-14	Postdoc	<i>Translating MATLAB to Java and Android bytecode</i>
<b>Graduated Ph.D. Students (2010-present)</b>			
Rahul Garg	09-15	Ph.D.	<i>A toolkit for building dynamic compilers for array-based languages targeting CPUs and GPUs</i>
Nurudeen Lameed	08-13	Ph.D.	<i>Dynamic compiler optimization techniques for MATLAB</i>
<b>Graduated M.Sc. Students (2010-present)</b>			
Vincent Foley	13-16	M.Sc.	<i>Static translation of MATLAB to JavaScript</i>
Ismail Badawi	12-15	M.Sc.	<i>McIDE: a MATLAB IDE powered by dynamic analysis</i>
Sameer Jagdale	12-15	M.Sc.	<i>Velocly: An Optimizing Compiler for MATLAB and Python</i>
Sujay Kathrotia	12-15	M.Sc.	<i>McNumJS: A JavaScript Library for Numerical Computations</i>
Andrew Bodzay	11-14	M.Sc.	<i>AspectMatlab++: Developing an Aspect-oriented Language for Scientists</i>
Mathieu Dubet	11-14	M.Sc.	<i>Efficient JIT Compilation of MATLAB</i>
Xu Li	11-14	M.Sc.	<i>Mc2For: A MATLAB to Fortran95 Compiler</i>
Vineet Kumar	11-14	M.Sc.	<i>MiX10: Compiling MATLAB to X10 for High Performance</i>
Soroush Radpour	09-11	M.Sc.	<i>Program Understanding and Refactoring Tools for MATLAB</i>
Anton Dubrau	09-11	M.Sc.	<i>Advanced Techniques for Matlab-to-Fortran Translation</i>
Jesse Doherty	08-11	M.Sc.	<i>McSAF: An Extensible Static Analysis Framework for the MATLAB Language</i>
Amina Aslam	08-10	M.Sc.	<i>McFLAT: A Profile-based Framework for MATLAB Loop Analysis and Transformations</i>
Toheed Aslam	08-10	M.Sc.	<i>AspectMatlab: An Aspect-Oriented Scientific Programming Language</i>

Table 3: Graduated M.Sc., Ph.D. Students and Post-Doctoral Researchers (2000 to 2009)

<b>Post Doctoral Researchers (2000-2009)</b>			
Patrick Lam	2007	Postdoc.	<i>Efficient Runtime Monitors</i>
Antoine Mine	2005	Postdoc.	<i>Purity Analysis</i>
<b>Graduated Ph.D. Students (2000-2009)</b>			
Eric Bodden	06-09	Ph.D.	<i>Verifying Finite-State Properties of Large-Scale Programs</i>
Ondrej Lhotak	03-06	Ph.D.	<i>Program Analysis Using Binary Decision Diagrams</i>
Feng Qian	01-05	Ph.D.	<i>Runtime techniques and interprocedural analysis in Java Virtual Machines</i>
Etienne Gagnon	98-02	Ph.D.	<i>A Portable Research Framework for the Execution of Java Bytecode</i>
Yingchun Zhu	94-00	Ph.D.	<i>Compiling for Multi-threaded Architectures</i>
<b>Graduated M.Sc. Students (2000-2009)</b>			
Maxime Chevalier-Boisvert	07-09	M.Sc.	<i>McVM - an Optimizing Virtual Machine for the MATLAB Programming Language (cosupervised with Clark Verbrugge)</i>
Jun Li	07-09	M.Sc.	<i>McFOR: a MATLAB-to-Fortran95 Compiler</i>
Andrew Casey	07-09	M.Sc.	<i>The MetaLexer Lexer Specification Language</i>
Dehua Zhang	06-08	M.Sc.	<i>Aspect Impact Analysis</i>
Michael Batchelder	05-06	M.Sc.	<i>Java Bytecode Obfuscation</i>
Nomair Naeem	03-06	M.Sc.	<i>Programmer-friendly decompiled Java</i>
Jingwu Li	04-06	M.Sc.	<i>Improving the Compiling Speed of the AspectBench Compiler (project)</i>
Jennifer Lhotak	04-05	M.Sc.	<i>Visualization Tools for Optimizing Compilers</i>
Chris Goard	02-05	M.Sc.	<i>Measuring and Improving the Runtime Behaviour of AspectJ Programs</i>
Navindra Umanee	01-05	M.Sc.	<i>Shimple: An Investigation of Static Single Assignment Form</i>
Anatole Le	02-05	M.Sc.	<i>Using Inter-Procedural Side-Effect Information in JIT Optimizations</i>
David Belanger	02-05	M.Sc.	<i>SableJIT: a retargetable just-in-time compiler (co-supervised with E. Gagnon)</i>
Bruno Dufour	02-04	M.Sc.	<i>Objective Quantification of Program Behaviour Using Dynamic Metrics (co-supervised with C. Verbrugge)</i>
Marc Berndl	01-03	M.Sc.	<i>Dynamic Profiling and Trace Cache Generation for a Java Virtual Machine</i>
John Jorgensen	00-03	M.Sc.	<i>Exceptions in Java (M.Sc. Project)</i>
Ondrej Lhotak	01-03	M.Sc.	<i>SPARK: A flexible points-to analysis framework for Java</i>
Rhodes Brown	00-03	M.Sc.	<i>STEP: A Framework for the Efficient Encoding of General Trace Data</i>
Jerome Miecznikowski	99-03	M.Sc.	<i>New algorithms for decompiling Java and their implementation in Soot</i>
Qin Wang	01-02	M.Sc.	<i>EVolve: An Extensible Software Visualization Framework (co-supervised with K. Driesen)</i>
David Eng	00-02	M.Sc.	<i>Combining Static and Dynamic Data in Code Visualization</i>
Feng Qian	99-01	M.Sc.	<i>A Comprehensive Approach to Array Bounds Check Elimination in Java</i>
Raja Vallée-Rai	97-00	M.Sc.	<i>Soot: An Optimization Framework for Java Bytecode</i>
Chrislain Razafimahefa	96-00	M.Sc.	<i>Practical Side-effect analysis for Java</i>

Table 4: Graduated M.Sc., Ph.D. Students and Post-Doctoral Researchers (1990-1999)

<b>Post Doctoral Researchers (1990-1999)</b>			
Marc Pouzet	95-96	Postdoc.	<i>Instruction Scheduling via Fold/Unfold</i>
<b>Graduated Ph.D. Students (1990-1999)</b>			
Rakesh Ghiya	96-99	Ph.D.	<i>Putting Pointer Analysis to Work</i>
<b>Graduated M.Sc. Students (1990-1999)</b>			
Vijay Sundaresan	97-99	M.Sc.	<i>Practical Techniques for Virtual Call Resolution in Java</i>
Etienne Gagnon	94-99	M.Sc.	<i>Sable CC Framework</i>
Laleh Tajrobehkar	97-99	M.Sc.	<i>JJC - A Java to Jimple Compiler (M.Sc. Project)</i>
Phong Co	95-99	M.Sc.	<i>Obfuscating Java Bytecode (M.Sc. Project)</i>
Greg Ward	93-98	M.Sc.	<i>Bibliography Tool (M.Sc. Project)</i>
Emily Ezust	94-97	M.Sc.	<i>Pre-spilling using interval graphs (M.Sc. Project)</i>
C. Lapkowski	94-97	M.Sc.	<i>Symbolic Dependence Tests and Extended SSA Numbering</i>
Guirlyn Olivar	95-97	M.Sc.	<i>Fast Points-to Analysis for McCAT (M.Sc. Project)</i>
Shereen Ghobrial	95-97	M.Sc.	<i>Shared Variables in EARTH-C</i>
Jean M. Roque	94-95	M.Sc.	<i>Implementation of Independent Loops in High Performance C (co-supervised)</i>
Yingwei Zhang	93-95	M.Sc.	<i>Instruction Scheduling and Register Allocation for the McCAT Compiler</i>
Ana Maria Erosa	93-95	M.Sc.	<i>A Goto-elimination Method and its Implementation for the McCAT C Compiler</i>
Justiani	93-95	M.Sc.	<i>A Practical Array Dependence Analysis for an Optimizing/Parallelizing C Compiler</i>
Jing Wu	91-95	M.Sc.	<i>A Parallel Flow Analysis Method on Structured Programming Languages</i>
Rakesh Ghiya	93-95	M.Sc.	<i>Practical Techniques for Interprocedural Heap Analysis</i>
Chris Donawa	92-94	M.Sc.	<i>The Design and Implementation of a Structured Backend for the McCAT C Compiler</i>
Maryam Emami	91-93	M.Sc.	<i>A Practical Interprocedural Alias Analysis for an Optimizing/Parallelizing C Compiler</i>
Sumithra Jagannath	90-92	M.Sc.	<i>Measuring Dynamic Program Characteristics (M.Sc. Project)</i>
Matilda Leung	90-92	M.Sc.	<i>The Design and Implementation of the LAST Interpreter (M.Sc. Project)</i>
Weiren Ding	90-92	M.Sc.	<i>SELSYN-C: A Self-Synchronizing Parallel Programming Language</i>
Bhama Sridharan	90-92	M.Sc.	<i>An Analysis Framework for the McCAT Compiler</i>
ZhiPing Qiu	89-92	M.Sc.	<i>The Design and Implementation of a Compiler for Conformance Testing</i>

## Recent undergraduate research projects

- Irene Wood, COMP 400, Fall 2018, *Physician visualization of patient-reported outcomes*, (co-advised with J. Kildea)
- Jordan Itzkovitz and Noah Levine, ECSE 456A, Fall 2018, *Extended functionality for Opal Questionnaires*.
- Xuer Liang, COMP 396, Fall 2018, *Adding Caregiver-specific educational materials to the Opal Caregiver Module*
- Vince Porporino, COMP 400, Fall 2018, *Extending Opal Questionnaires to handle conditional flow and other extensions*
- Sandrine Monfourny-Daigneault, COMP 400, Fall 2018, *Personalized educational material about chemotherapy in the Opal mobile app*
- Yunwen Ji, COMP 402, Fall 2018 and Winter 2019, *Capturing key personalized information during the first medical oncology consult for breast cancer patients*
- Charlotte Ding, COMP 396, Winter 2018, *Project Behave: A Web Application for Data Analysis*
- Ariane Schang, COMP 400, Winter 2018, *Handling Conditional Questions in Patient Questionnaires*
- Daniel Lutes, COMP 396, Winter 2018, *Project Trigger: Tracking Patient Reported Outcomes*
- Hongji Chen, COMP 400, Winter 2018, *A Domain-specific Language for Peephole Optimization in the JOOS Compiler*
- James Mesich, COMP 396, Winter 2018, *Project Zombie: Automated Testing of the Opal Application*
- James Brace, COMP 400, Winter 2018, *Exploring the Performance of Deep Learning in Modern Web Browsers*
- Shenyang Huang, COMP 396, Winter 2018, *Enhancements of the Caregiver App, a companion to the Opal Patient App*
- Zhengbo Wang, COMP 396, Winter 2018, *Refining questionnaire visualizations for the Opal App*
- Zhaning Zhang, COMP 396, Winter 2018, *Project QALG: Defining, Storing and Applying Algorithms of Questionnaires*
- Amior Schmidt, COMP 396, Fall 2017, *Predicting Late Arrivals with Machine Learning*
- Anna Jolly, COMP 396, Fall 2017, *Redesigning Questionnaires in the Mobile Application Opal*, co-supervised by Tarek Hijal.

- Kevin Samary, COMP 396, Fall 2012, *A study of the efficiency of vector computations in MATLAB*

## Administrative Duties

### Current Administrative Duties

- Member of the Women@SOCS committee, 2006 to present.
- Member of the Tenure and Promotions committee (SOCS).
- Member of the M.Sc. committee (SOCS).

### Past Administrative Duties

- Member of the ad-hoc committee on undergraduate enrollment and recruitment, 2011 to 2015.
- Member of McGill University Senate, 2008-2010.
- Associate Dean (Academic), Faculty of Science, Sept. 2005 to Aug. 2014. Associated duties: Member of the Council of Chairs, Vice-chair of the Academic Committee, Member of the University site-licensing group, Member of the University Admissions Committee (until 2009), Member of the B.A.&Sc. PAC (Chair on alternate years), Member of the Joint Faculty of Education and Faculty of Science Committee, Member of the Academic Policy Committee (2011-2014).
- Member of the M.Sc. program committee (2014-2015).
- Member of the Tenure and Reappointments Committee, School of Computer Science, 2003 to 2009.
- Chair, Ad-hoc committee on undergraduate enrollment and recruitment, 2007 to 2009.
- Member of the SOCS Advisory Committee, 2006-07.
- Chair of the Work Group on Womens' Academic Careers, Faculty of Science, 2004-2006.
- Member of Ph.D. Committee, School of Computer Science, 2004-2005.
- Member of Software Engineering Committee, School of Computer Science, 2004-2005.
- Member of the Recruiting Committee, School of Computer Science, July 1997 to 2005.
- Chair of the Software Engineering Committee, School of Computer Science, 2002-2003.
- Member of the Faculty of Science Committee on Student Standing, 2002-2003.
- Member of the Faculty of Science Tenure Committee, 1999-2004.
- Member of the Faculty of Science, Leo Yaffe Award Committee. (Decides upon the the recipient for the Leo Yaffe Award, given to the best teacher in the Faculty of Science), 1999-2001.
- Member of the Undergraduate Committee, School of Computer Science, July 1999 to August 2002.

- Member of the M.Sc. Committee, January 1999-June 1999.
- Chair of the School of Computer Science Space Allocation Committee, July 1997 to September 1998.
- Chair of the Committee on Women in Engineering, Sept 1995 to July 1996.
- Member of the Board of the McGill Centre for Research and Teaching on Women (Faculty of Engineering Representative), Sept 1994 to August 1995.
- Member of the Academic Committee, Faculty of Engineering, September 1994 to July 1996.
- Member of the Academic Committee, Faculty of Science, September 1992 to October 1993.
- Member of the Administration/MAUT Joint Committee on Intellectual Property (Software Sub-committee), March 1992 to October 1993.
- Co-chair of the Undergraduate Committee, School of Computer Science, June 1991 to July 1995.
- Member of the Undergraduate Committee, September 1990 to September 1998.
- Chair of the Minor Program in Computer Science (Arts, Science, and Engineering), September 1990 to September 1998.
- Member of the Ad-hoc Committee on Women in Engineering, September 1990 to June 1991.

## Professional Activities

### Reviewing

- Member of the Editorial Board for ACM Books, Programming Languages, 2013 to 2017.
- Reviewing for a wide variety of journals and granting agencies.

### Conference Program Chairs

I have been the Program Chair of the two major international compiler conferences. I believe that I am the only Canadian to have been Program Chair of both of them. Given the importance of conferences in my field it is a challenging job which is given to the leaders in the field.

- ARRAY 2015, ACM SIGPLAN 2nd International Workshop on Libraries, Languages and Compilers for Array Programming, Chair.
- Program Committee Chair, International Conference on Compiler Construction, (CC 2008), 2007-2008.
- Program Committee Chair, SIGPLAN 2002 Conference on Programming Language Design and Implementation (PLDI '02), 2002.

## Conference Program Committee Memberships

I been a program committee member on all of the big ACM conferences in my field and related fields. Program committee membership usually involves serious reviewing of 15-30 papers, reacting to author responses, and participating in a program committee meeting which is used to choose the papers to accept.

- ARRAY 2016, ACM SIGPLAN 3rd International Workshop on Libraries, Languages and Compilers for Array Programming, member of Program Committee.
- X10 2016, ACM SIGPLAN X10 Workshop, member of Program Committee.
- CC 2016, International Conference on Compiler Construction, member of Program Committee.
- OOPSLA 2015, ACM International Conference on Programming Language Design and Implementation, member of Program Committee.
- SOAP 2014, ACM SIGPLAN International Workshop on the State of the Art in Java Program Analysis, member of the Program Committee.
- ARRAY 2014, ACM SIGPLAN International Workshop on Libraries, Languages and Compilers for Array Programming, founding organizer.
- ECOOP 2014, European Conference on Object-Oriented Programming, member of the Program Committee.
- PLDI 2013, ACM SIGPLAN Conference on Programming Language Design and Implementation, member of the Program Committee.
- SOAP 2013, ACM SIGPLAN International Workshop on the State of the Art in Java Program Analysis, member of the Program Committee.
- TACAS 2013, International Conference on Tools and Algorithms for the Construction and Analysis of Systems, member of the Program Committee.
- ISSTA 2012, International Symposium on Software Testing and Analysis, member of the Program Committee.
- SOAP 2012, ACM SIGPLAN International Workshop on the State of the Art in Java Program Analysis, one of the founding organizers, and member of the Program Committee.
- PLDI 2012, ACM SIGPLAN International Conference on Programming Language Design and Implementation, member of the Program Committee.
- OOPSLA 2011, ACM International Conference on Object-Oriented Programming, Systems, Languages and Applications, member of the External Review Committee.
- ASPLOS 2011, ACM Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS '11), member of the External Review Committee.

- International Conference on Compiler Construction, (CC 2010).
- ACM ASPLOS 2010 Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS '10).
- ACM SIGPLAN 2009 Conference on Programming Language Design and Implementation (PLDI '09).
- ACM SIGPLAN 2008 International Conference on Object-Oriented Programming, Systems, Languages, and Applications (OOPSLA 2008).
- Seventh ACM SIGPLAN-SIGSOFT Workshop on Program Analysis for Software Tools and Engineering (PASTE 2007).
- Sixth International Conference on Aspect-Oriented Software Development, (AOSD 2007).
- ACM SIGPLAN 2006 Conference on Programming Language Design and Implementation (PLDI '06).
- ACM International Symposium on Memory Management (ISMM '04), 2004.
- 2nd eclipse Technology eXchange workshop (eTX), a satellite event of ETAPS 2004.
- ACM SIGPLAN-SIGACT Symposium on the Principles of Programming Languages (POPL '02), 2002.
- International Static Analysis Symposium (SAS '01), 2001.
- Co-organizer of the Dagstuhl Seminar 451, Effective Implementation of Object Oriented Programming Languages, November 2000.
- ACM SIGPLAN 2000 Conference on Programming Language Design and Implementation (PLDI '00), 2000.
- IWAOOS '99 (Intercontinental Workshop on Aliasing in Object-Oriented Systems), co-located with ECOOP (European Conference on Object-Oriented Programming), 1999.
- ACM SIGPLAN-SIGACT Symposium on the Principles of Programming Languages (POPL '99), 1999.
- International Static Analysis Symposium (SAS '98), 1998.
- Seventh IEEE International Conference on Computer Languages, 1998.
- 12th Annual International Symposium on High Performance Computing Systems and Applications (HPCS '98), 1998.
- International Static Analysis Symposium (SAS '97), 1997.
- ACM SIGPLAN-SIGACT Symposium on the Principles of Programming Languages (POPL '97), 1997.

- ACM SIGPLAN Conference on Programming Language Design and Implementation (PLDI '95), 1995.
- International Conference on Compiler Construction, 1994.
- Fifth IEEE International Conference on Computer Languages, 1994.
- ATABLE '92, The Second International Workshop on Array Structures, 1992.

### **Reviewer - Journals**

- ACM Transactions on Programming Languages and Systems
- The Journal of Parallel and Distributed Computing
- ACM Letters on Programming Languages and Systems
- Parallel Computing
- The Journal of Programming Languages
- IEEE Transactions on Parallel and Distributed Systems
- IEEE Transactions of Software Engineering
- IEEE Proceedings on Supercomputer Technology
- Parallel Processing Letters
- Information Processing Letters

### **Reviewer - Conferences**

- Micro-32, 32nd Annual International Symposium on Microarchitecture, 1999.
- The 11th Annual International Symposium on High Performance Computing Systems
- Symposium on Parallel and Distributed Processing
- ACM International Conference on Architectural Support for Programming Languages and Operating Systems (sponsored by the ACM and in cooperation with the IEEE Computer Society).
- ACM International Conference on Supercomputing
- PARLE (Parallel Architectures and Languages Europe)
- ACM SIGPLAN Conference on Programming Languages and Implementation
- CONPAR92-VAPP V
- IEEE International Conference on Computer Languages

- International Conference on Distributed Computing Systems
- 17th Annual International Symposium on Computer Architecture
- International Conference of Parallel Processing
- Workshop on Languages and Compilers for Parallel Architectures
- CASCON

### **Other Professional Activities**

- Member of the SIGPLAN Awards Committee
- Member and Fellow ACM, and ACM SIGPLAN.
- Reviewer of grant proposals for: NSERC (CANADA), FCAR (Quebec), INRIA (France), and NSF (USA).
- Past Member of the CC and ETAPS steering committees.
- Past Member of the PLDI steering committee.
- Past member of the Professional Activities Committee of SIGPLAN (ACM).
- Past Member of IEEE, IEEE Computer Society
- Member of the Appointments Board for the School of Mathematical and Computing Sciences, Chalmers University of Technology and Gothenburg University, Sweden, 1997.

### **Interruptions in Research**

I have had no interruptions in my research activity, although I was treated for stage 2 breast cancer in 2014 and have been treated for metastatic breast cancer since September 2016, which has reduced my ability to travel and to participate in external activities.
